BEFORE THE DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
STATE OF UTAH

---ooOoo---  
IN THE MATTER OF TENTATIVE : NOTICE OF TENTATIVE  
DECISION TO APPROVE A LARGE : DECISION TO APPROVE  
MINING AND RECLAMATION :  
FOR H.E. DAVIS CONSTRUCTION, : NO. M/023/016  
INC., LEVAN GYPSUM MINE, :  
JUA8 COUNTY, UTAH :  
---ooOoo---

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF  
PRODUCTION, MINERAL AND ROYALTY OWNERS, AND  
PARTICULARLY ALL PERSONS INTERESTED IN SECTION 33,  
TOWNSHIP 14 SOUTH, RANGE 1 EAST, SLBM, JUA8  
COUNTY, UTAH.

Notice is hereby given by the Division of Oil, Gas  
and Mining of its tentative decision to approve the Large  
Mining Operations Notice of Intention for H.E. Davis Con-  
struction, Inc.'s Levan Gypsum Mine. Mining activities will  
affect portions of the following areas: SE1/4 and  
SW1/4 of Section 33, Township 14 South, Range 1 East,  
Juab County, Utah.

H.E. Davis Construction, Inc. has submitted a permit  
application to expand an existing small mining project to  
a large mining operation. The operator will employ the  
following mining and reclamation techniques on ap-  
proximately 42.85 acres of federal and private land.

**During Operations:** Gypsum will be mined by open  
pit, bench excavation methods. Suitable plant growth  
(soil) material overlying the gypsum deposit will be sal-  
vaged for final reclamation. Approximately 900 cubic  
yards per year will be stockpiled and protected.  
Typical drilling and blasting techniques will be used to  
remove the gypsum from the deposit. Trackhoes and  
loaders will load the material into haul trucks, which will  
then be transported to the processing area. Approx-  
imately 100,000 cubic yards of gypsum will be mined  
each year. All material mined from the deposit will be  
consumed and no tailings will be generated. A portable  
jaw crusher and screen plant will size the gypsum into  
fines, -2 inch and -6 inch products. The sized material  
will be placed in stockpiles, loaded onto transport trucks  
and hauled to offsite markets. Safety berms will be  
maintained above highwalls and along haul roads. Two  
temporary diesel fuel tanks will be kept on site. All fuel  
and lubricants will be placed in plastic lined bermed ar-  
eas to retain any spills. Some concurrent regrading  
work will occur during mining operations.

**After Operations:** The entire mining operation will  
be reclaimed. The final mine excavation will consist of  
eight benches, each 40 feet high and 20 feet wide.  
Compacted areas will be ripped and all areas will be  
covered with 6 inches of soil material. Stockpiled soil  
material will be tested and amended with 10 tons/acre  
of composted manure if necessary. All areas will be hy-  
dro-seeded or hand broadcasted with an approved  
seedmix. The eight 20-foot wide benches will be cov-  
ered with 6 inches of topsoil, seeded and then raked.

The person representing the company is Mr. Tony  
Christofferson; Phone (801) 802-6913. H.E. Davis Con-  
struction, Inc. is fulfilling obligations under the Utah  
Mined Land Reclamation Act of 1975, Utah Code Ann.  
§40-8-18.

Any person or agency aggrieved by this tentative  
decision to issue approval is hereby requested to submit  
written protest within thirty (30) days of the date of  
publication to Mary Ann Wright, Associate Director of  
Mining, Division of Oil, Gas and Mining, 1594 West  
North Temple, Suite 1210, Box 145801, Salt Lake City,  
Utah 84114-5801, setting forth factual reasons for the  
complaint. If no responsive written protests are received  
by the Division within 30 days after the last date of  
publication, the tentative decision of the Division will be  
final.

DATED THIS 9th day of December, 2002
